

Integrated Management System

Environmental Policy

The policy of Abnormal Load Engineering is to undertake its work in accordance with the relevant statutory provisions on environmental management and control, using the best practicable methods outlined in the relevant codes and standards.

An Environmental Management System complying with ISO14001: 2004 shall be implemented to control the environmental aspects of the Company's activities.

The prevention of pollution and the use of renewable or sustainable resources are seen as prime objectives to be achieved by the company.

The management recognise that they have a key responsibility for ensuring adequate environmental controls. To this end the principles of effective environmental management shall be an integral part of other management functions. Abnormal Load Engineering are committed to the reduction, within economic constraints, of the environmental impact of its activities.

The Company is also committed to comply with any applicable legal requirements and with other requirements to which Abnormal Load Engineering subscribe which relate to its environmental aspects.

The Managing Director has ultimate responsibility for implementing this policy. However the day-to-day management of environmental issues is delegated to all Managers who are expected to implement this policy in conjunction with their staff through a documented Environmental Management System.

The HSQE Manager has been appointed to advise, assist and monitor environmental matters, reporting to the Managing Director. The objectives and targets for environmental improvement shall be set by Senior Management and reviewed annually with revisions as appropriate. The reviews are expected to set objectives that lead to continuous improvement.

This policy together with the general arrangements, objectives and targets for improvement shall be brought to the attention of all employees, suppliers and sub contractors used by the company. This policy shall also be made available to the public.

This policy shall be reviewed annually and republished at least every two years.

Executive Director
